

**Safinah Group**

360° Coating & Engineering Experts

## **Safinah Technical Field Services**

A comprehensive range of services tailored to the needs of our clients to support coating projects of all types.

---

## Safinah Technical Field Services

Since 1998 the Safinah Group has unrivaled experience in independent assessment of the scope of work to ensure that project budget and objectives are met.

### Why choose an independent coating superintendent?

**Coating and related issues have become a significant expense for ships, yachts and Offshore Projects. While the cost of the coating itself can be negligible, the difference between a successful or unsuccessful coating project can be significant, and have environmental consequences if the coating is not performing for instance increased operating costs and GHG emissions.**

An independent coating superintendent provides the owner/operator an impartial assessment of the scope of work to be done and how the objectives of the project and its budget can be met.

Safinah Group has over the recent years experienced an increase in demand for this service due to greater awareness of the increased complexity of coating projects, to ensure that performance, ROI, emissions and other regulations as well as H&S requirement are all met.

We act as our clients eyes and ears on all matters relating to coating and depending on the scope under which we are engaged we can provide, pre-planning, schedule monitoring and budget control as well as on-site supervision, inspection and recommendations to ensure objectives are met or risks highlighted, mitigated and reported.

## Why choose the Safinah Group

The Safinah Group has coating superintendents in key locations around the world: China, South East Asia, Southern Europe, Northern Europe and the Americas. That means we are readily available and able to resource projects globally even at short notice.

We manage more than 4000 inspection days on annual basis and supervise more than 200 dry-docking and other projects worldwide annually on behalf of clients.

We assist clients by providing the full range of services from complete project pre-planning and management to simple oversight/quality inspections to ensure compliance with the scope and specifications.

Our experienced team of field personnel can draw on the knowledge base of the data collected from all the vessels we see relating to the in-service behaviour of the coatings and how they are performing, and use that also to identify any issues in the pre-drydocking or in-docking assessment and work scope planning.

Should any issue arise, the technical team have direct access to the highly experienced and specialised Safinah Consulting team which consist of Ph.Ds', Chemists, Engineers and Naval Architects. A world leading team of experts that are dedicated to solving our clients coating problems and offering expert advice and guidance to ensure any claims made are based on proper assessment to maximise the potential of success.

## What we can offer

By data mining the results of all our projects we have developed insights on coating performance across a range of project types from surveys, maintenance campaigns and dry-dockings.

Records from previous offshore project / dry-dockings are kept and made available/used for planning prior to the next dry-docking. Keeping these records allows us to provide our clients with informed decisions based on past experience and current plans, needs and objectives as well as market trends.

## Services we offer

We offer a menu of service options tailored to the needs of clients to deal with ships of all types and ages.

We assess the objectives and goals of the project and request pre-drydocking / Project information and history to enable us to prepare to ensure the Project/ drydocking is tailored to the client needs.

## Summary

- **Reduce Risk:** Monitor and report on the coating process on behalf of the client
- Estimate and budget a work scope for a project
- Comply with regulations
- Help control GHG emissions
- **Reduce Cost:** with an in depth understanding of coatings and application methods, the coating superintendent can advise on product choice, drying & recoating times to streamline the process, reducing application time and costs.
- Specialists in negotiation skills with yards, applicators, coating manufacturers, claim assessors and insurance companies to optimise efficiency, resolving any unexpected issues before they escalate.
- **Return on investment:** ensure the right coatings, correct preparation and application are used as specified to give maximum protection
- **Highly trained:** with FROISO or NACE along with extensive Internal & specialist trainings with knowledge share philosophy
- **Knowledge:** Large internal specialist knowledge base for all aspects of coatings
- Working in partnership with all members of the project management team

---

**Annually** Safinah Group manage more than  
**4000 inspection days** and supervise over  
**200 projects** worldwide on behalf of clients.
