
Coating Project Management

Use Safinah Group's coating project management experts to minimise project delays or overruns and reduce the cost of coatings over asset lifetime.

If you are looking for worry-free, independent specialist coating support for any project, new construction or major refurbishment, from a yacht new building to the re-coating of a marine structure, from a skyscraper construction to an offshore wind farm, our coating project management team has all the expertise to help you engineer the perfect finish.

We can work with you to deliver savings by managing coating related activities across your assets to reduce operating costs against current benchmark levels.

Safinah Group can provide a comprehensive range of services to support your project from inception through to completion and handover.

- Contract negotiation and tender management
- Design and specification review
- Coating technology, specification and product selection
- Support during project
- Project completion and handover

These services will help to ensure that the coating of your asset is delivered fit for purpose, on time at optimal cost and that it will perform over the design time.
