
Design Optimisation

Our expert consultants provide design optimisation for coating performance will to reduce through-life costs, decrease operating costs and minimise in-service downtime.

Safinah Group offers a comprehensive design optimisation review service to ensure the performance of the selected coating systems are ideal for the design of your asset.

Safinah Group can add value early in a project by helping you to avoid pitfalls that subsequently result in increased cost, time and risk to your project.

Our design optimisation review will:

- Highlight design faults
- Assess the impact on cost and operations
- Recommend design changes to eliminate faults

Our in-house team's expertise in structural design, whether it's ships, yachts, FPSOs or wind farms can help identify potential trouble spots for coating system performance before the project begins. **Prevention is better than cure.**
