## **Professional Technical & Engineering Services**

Management and delivery of engineering services for complex vessels.

---

# Professional Technical & Engineering Services

Safinah Group is a unique consultancy operating globally with a deep knowledge across a diverse range of industry sectors. By gaining a comprehensive understanding of client needs, we provide professional services and technical advice to asset managers, owner/operators, fabricators, OEM's and legal and insurance firms.

## Knowledge

Safinah Group's personnel have comprehensive knowledge in the management and delivery of engineering services for complex vessels. Our in-house team of Chartered Engineers is made up of individuals who have extensive prior experience within blue chip companies.

With a significant portfolio of project experience and knowledge of all major National and International regulatory body requirements Safinah Group can ensure that your assets are developed and protected throughout their working life, maximising availability and maintaining value.

## Collaboration

By ensuring a comprehensive understanding of your goals and drawing upon our extensive knowledge of the marine industry we provide a unique approach to technical services. Safinah Group can provide a seamless addition to any execution team and offer fast response times to enable target dates to be met.
